

Gluco Care Diabetic Life

COMPLETE & BALANCE NUTRITION POWDER

Specially Formulated to Support a Healthy Lifestyle Everyday for People with Diabetes.

PRODUCT FEATURES:

- High in Antioxidant Vitamin C & E.
- Contain Essential Vitamins and Minerals.
- High in Protein.
- Very Low in Sefton.
- The Milk of my Life
- 25 ESSENTIALS VITAMINS & MINERALS
- GLUCO CARE DIABETIC™ Specially Formulated to Support a Healthy Lifestyle Everyday for People with Diabetes POWDERED MILK .

PREPARATION OF FEEDINGS

Carefully follow these instructions. Use only as directed by a medical professional. Proper hygiene, preparation, dilution, use and storage are important when preparing infant formula. Powdered formulas are not sterile and should not be fed to premature infants or infants who might have immune problems unless directed and supervised by a doctor.

Discuss with parents whether they need to use cooled, boiled water for mixing and whether they need to boil clean utensils, bottles and nipples in water before use.

1 Wash hands thoroughly with soap and water before preparing formula.

2 Pour the desired amount of water into the bottle. Add powder.

3 Cap bottle and shake well.

Use the following chart for correct amounts of water and powder. Use scoop in can to measure powder. Store DRY scoop in its original can:

To Make	Water	Powder	Weight
2 fl oz	2 fl oz	1 Packed Level Scoop	8.6 g
4 fl oz	4 fl oz	2 Packed Level Scoop	17.2 g
6 fl oz	6 fl oz	3 Packed Level Scoop	25.8 g
8 fl oz	8 fl oz	4 Packed Level Scoop	34.4 g
1 quart	28.5 fl oz	1 Packed Level Household Measuring Cup	122.55 g

CAUTION: Use product by the date on the container. Nutritional powders are not sterile.

WARNING: Do not use a microwave oven to prepare or warm formula. Serious burns may result. This product is not recommended for routine use in very low-birth-weight infants. Some of these infants may be at increased risk of developing gastrointestinal complications. Use with directions from the baby's physician.

Failure to follow these instructions could result in severe harm. Once prepared, infant formula can spoil quickly. Either feed immediately or cover and store in refrigerator at 35°–40°F (2°– 4°C) for no longer than 24 hours. Do not use prepared formula if it is unrefrigerated for more than a total of 2 hours. Do not freeze prepared formula. After feeding begins, use within 1 hour or discard. Powder Storage (cans) Store cans at room temperature. After opening can, keep tightly covered, store in dry area and use contents within 1 month. Do not freeze powder, and avoid excessive heat. Use by date on bottom of can. Shake well before feeding.
